WORK EXPERIENCE

Dynamic Method Solutions

Software Development Junior — Jan 2025 - Present

- Working on a product-based healthcare platform for multiple clinics in Canada (appointments, payments, patient records, referrals).
- Build frontend features with Angular + Bootstrap and backend APIs with Laravel, focusing on simple, fast, and reliable user flows.
- Integrate Canadian health card services and AWS S3 for secure document storage, while coordinating with clients and the team for smooth releases.

La Net Software Solutions Team Pvt Ltd.

Software Development Intern — Jan 2024 - July 2024

- Developed user-friendly web pages and features using HTML, CSS, JavaScript, and the MERN stack.
- Built modules with Next.js / NestJS and MongoDB, focusing on clean structure, performance, and scalable data storage.
- Integrated AWS S3 for media and document uploads and helped fix UI/backend issues on live projects.

PROJECTS

Trillium — Jan 2025 - Present

- Multi-portal system for admin, clinic, patient, and referral doctors with role-based access.
- Manages patient profiles, cases, appointments, payments, and reports in one place.
- Integrated Canadian health card verification and secure storage with AWS S3.
- Built using Laravel, Angular, MySQL, focusing on clean UX for clinic staff.

The Bus Network — April 2024 - July 2024

- Web platform for tour and school bus bookings with real-time management.
- Built with MERN + SQL and used Google Cloud for images and videos.
- Added AI-based email suggestions using ChatGPT to improve communication.
- Focused on clear flows for users to search, book, and manage trips easily.

Streamline — Jan 2024 - April 2024

- Platform to watch, download, and store movies with user accounts.
- Used MERN, Next.js, NestJS, MongoDB and AWS / Cloudinary for media storage.
- Integrated Stripe for subscriptions and secure payments.
- Designed simple user journeys: browse 'play 'subscribe 'manage content.

EDUCATION

Shantilal Shah Government Engineering College

Bachelor of Technology (IT) - 8.16 — Aug 2020 - June 2024

- Enjoyed my B.Tech journey by building projects like a Sports Management System and a Video Calling Web App using PHP, MySQL, HTML, CSS, and JavaScript, applying OOP and Data Structures in real work, collaborating with friends on GitHub, and growing both in coding and campus life.

SKILLS

Languages
- C, JavaScript, HTML, CSS, JAVA, PHP

Fremworks
- Next JS, Nest JS, MERN, MEAN, Laravel, Bootstrap, Tailwind, Electron JS, etc..

Cloud/Database/Tech-stack
- AWS S3 sevice, Cloudinary, My SQL, Mongodb, Firebase, phpmyadmin, Git Hub, etc..

Tools
- VS Code, Windsurf, Intelligence IDE, Jira, MS Team, Discord, etc..
